WORK EXPERIENCE

Full Stack Developer

Mar 2023 - Present

Hasotechnology | Madurai, Tamil Nadu

- Developed a Hospital Management System web application for children and newborn baby registration.
- Integrated **WhatsApp Business API** for automated patient reminders.
- Contributed to backend development using Node.js and Express.js for "Seller Central" web application integrated with Shopify, Shopee, Lazada and Magento APIs
- Worked on the frontend of the learning management system "Codebinx" using React.js.
- Built 4 WordPress websites.
- Received best employee of the year 2023 award.

Application Support Specialist

Nov 2021 - Nov 2022

Vnk Ventures | Kuala Lumpur, Malaysia

- Diagnosed and resolved application issues promptly to minimise downtime.
- Provided exceptional support to end-users, addressing inquiries and resolving technical issues related to applications.
- Updated documentation to reflect changes in application features and configurations.
- Collaborated with development teams to identify and resolve bugs and other issues.

PROJECTS

Hospital Management System

- Developed a patient registration system that efficiently captures patient data, including personal information and date of birth (DOB).
- Integrated WhatsApp Business API to send personalised marketing and reminder messages to patients based on their DOB and other data.
- Created a dedicated dashboard for patients that tracks their medical history, including visit records, diagnoses, prescribed treatments, and vaccination details

- Developed an analytics dashboard. This dashboard provides insights into the patient population, including demographics (age and location), vaccination utilisation, and common diagnoses.

Seller Central

- Integrated **Shopify and Magento APIs** into the application, allowing for the listing of products created within the app. Additionally, the application can fetch orders and customer data from these platforms and seamlessly incorporate them.
- Integrated Shopee and Lazada APIs, enabling the app to retrieve product listings, order information, and customer data from these e-commerce platforms.
- These integrations streamline the process for clients, allowing them to manage products and monitor orders from a single, user- friendly application.

Codebinx (Learning Management System)

- Contributed to Front end using ReactJs.
- Created certification functionality in the application.
